

Eurostone:

Europe's finest Colored sink material.

Eurostone is an extremely hard-wearing material created by using real quartz; the most durable component of granite; the fourth hardest natural material known to man, with a highly-durable acrylic resin.

Why Choose Eurostone ?

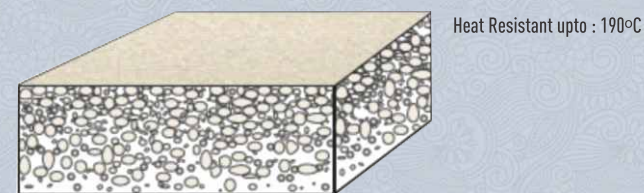

Eurostone is a Hard Face Acrylic Granite, this means that the working surface of the sink has a very high density of quartz particles.

Eurostone Core Section

High density of particles means the substrate is hard and is highly resistant to scratches, abrasion and chemicals.

Other popular acrylic granite sinks use the ico methodology, which means that the quartz is spread more evenly throughout the material.

Other Popular Brand Core Section

Even distribution of particles means the substrate is soft and can be more easily damaged by scratches, abrasion or chemicals.

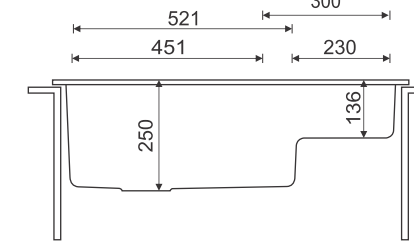

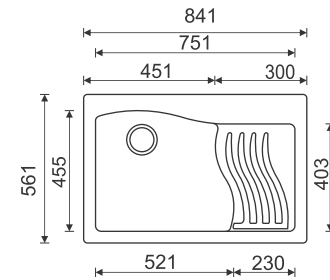

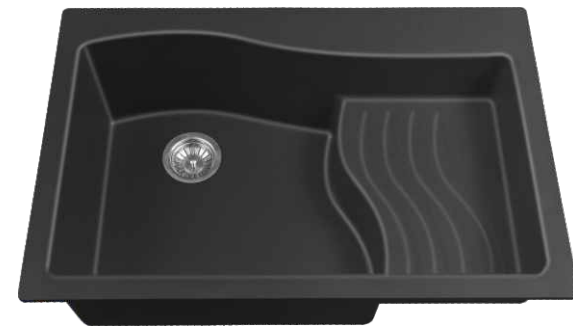

Installation

Eurostone 610 -84

Architecture Plan

Dimensions: 33 x 22 inch / 841 mm x 561 mm

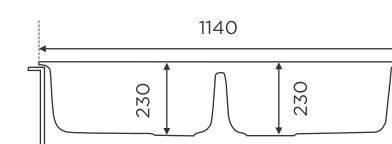

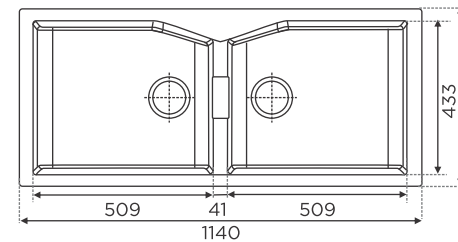

Bowl Size: 451-521 mm x455mm x 250mm
Bowl Size: 300-230 mm x403mm x 136mm

- Carbon Black
- Coffee
- Titanium Silver
- Graphite (metallic color)
