The future moving in.

Siemens Home Appliances

Combination of fridge and freezer with a plethora of benefits.

hyperFresh: Fruits and vegetables stay fresh and crisp for longer:

Whether storing apricots, broccoli or lettuce – the hyperFresh drawer lets you easily adjust the humidity level to the food stored inside using the manual slide control. This keeps everything fresh and crisp longer.

Reversible door

Siemens refrigerators come equipped with reversible doors to make your life easy. Now when you need your appliance to fit into a difficult space, you can choose to switch your doors to either side and open them without any hindrance.

VariInverter Compressor :

VariInverter Compressor works by adjusting to the changes in temperatures inside and outside the refrigerator and the load within and provides optimal performance* during voltage fluctuations.
